

Winter Wheat Care

AgVentures Full Circle Crop Care Plan

Taking Yield To The Next Yield Bump!

Seed Care: LW1065 @ 120#/ac

Seed Treatment: Incentive and Ascend

Fall Fertility: 24-6-12-7 @ 325#/ac

With 3 pass application plan to optimize your wheat yield.

1st Pass

Application Products:

Huskie 11 oz/ac + surfactants +5 gallons 28%

- Premier weed control of winter and summer annual and broadleaf weeds.

2nd Pass

Application Products:

StrategoYLD 4 oz/ac

Timing: At Flag Leaf

- Early fungicide application to help boost plants natural defense against yield robbing diseases like: rusts, leaf blights, and powdery mildew.

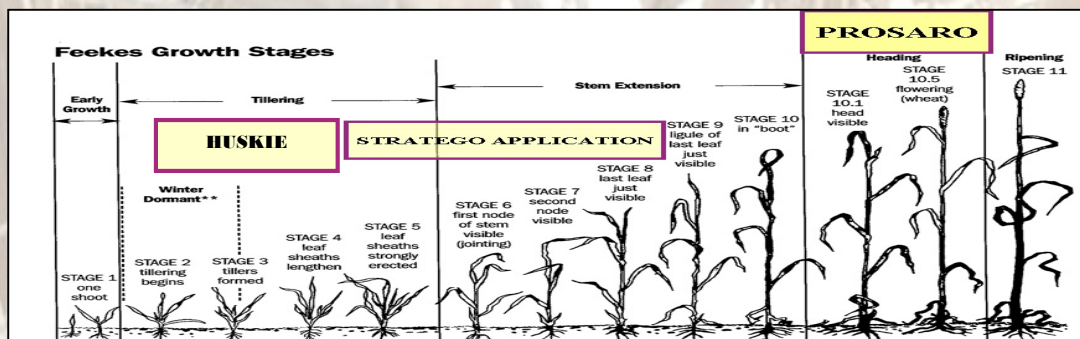

3rd Pass

Application Product:

Prosaro 6.5 oz/ac

Timing: At 25% Flowering

- Late Season fungicide application to keep plants healthy and prevent head diseases like scab, and new plant infections from occurring like rusts, leaf blights, and leaf spots.

Enviro-Pros field scouting program will monitor crop for optimum application timing.
